

# Sauer-Danfoss PVG 32

## Proportional Load Sensing Valve

The modular design of the Sauer-Danfoss PVG 32 load sensing valve, accommodates future control variations and gives you an almost infinite number of configuration possibilities.

- Mechanical, hydraulic and electro hydraulic control
- Compact and flexible design
- Load independent flow from 5 - 100 l/min [1.32 - 26.42 US gal/min]
- Can be used in combination with our range of HIC hybrid modules

*What really matters is inside®*
